WORK EXPERIENCE

Sterling Bank

Frontend Engineer

September 2021 – Present

Lagos, Nigeria

- Reduced development time of the banks investment web application by 30% by contributing to UI development.
- Improved security of investment application by writing tests for new and existing features.
- Implemented iterations of business requirements from time of joining the team to the time of launch by working closely with other developers, the product manager and the business development team.

Emergency Response Africa (ERA)

Frontend Engineer

November 2021 – Present

Lagos, Nigeria

- Built the user interface for an ambulance dashboard application which aids in ambulance and responder management for partner hospitals and medical organisations using web technologies Nexjs and tailwindcss.
- Set Up a continuous integration pipeline with github actions and integrated cypress tests and sentry error logging to the pipeline which boosted confidence in the uptime of the application and made it easier to find and trace bugs from code releases.
- Built the frontend for an internal Admin dashboard application to monitor user activity across the different products at ERA; this provided insight used by the rest of the team to further improve the products.

SKILLS

- Technical skills: Javascript, typescript, CSS, React.js, Vue.js, Next.js, Apollo/graphql, Node.js, Solidity.
- Soft Skills: Communication, fast learner, team player, problem solving.
